Alex,

Thanks much for the list of parameters for the 1200Z permit. Also, thank you for making time to meet with Lori, Rich and me to give us an update on your stormwater activities. Lori and I were very impressed with the progress and scope of DEQ's stormwater cleanup/control efforts in Portland Harbor. It is apparent that, with the CSO work, 1200Z permit and the individual site stormwater actions like those we saw at Arkema today, DEQ has a very focused program and we are grateful and pleased to see it all coming together.

I'm looking forward to working with you and Jim on the summary report for source control.

Hi Lori and Deb.

It was really great to meet with you today and to have the opportunity to discuss DEQ's work in Portland Harbor – particularly on stormwater.

As you requested, Lori, here is a link to DEQ's staff report on the latest iteration of the 1200-Z permit.
<http://www.deq.state.or.us/wg/stormwater/docs/1200ZCOLSpo.pdf> Info on impairment pollutant parameters that must be monitored starts on pg 9. It is noted to be consistent with the EPA Multi-Sector General Permit...

Also, as Deb requested, I've attached a list of the parameters that must be monitored under the 1200Z (since summer 2012). The list also has comparative values for Portland Harbor JSCS SLVs. Cr, Cd, & Ni don't have compliance values in the permit, they are just being monitored to gather info.

I hope you find this info useful. Let me know if you want to discuss it or would like additional info.

I look forward to working with you and your staff further as we collaborate to wrap up Portland Harbor over the coming years.

--Alex
